➡ NIKON NIKKOR lens-based digital cameras are simple to use and are relatively affordable. ➡ They're also the most basic in terms of professional photo-imaging capabilities. ➡ With a basic camera, you can generate neat photos and quality prints. However, you won't be able to achieve top-level results and professional prints, as Canon's DSLRs (Digital Single-Lens Reflex) allow you to do. ➡ Because of their big, rugged bodies

and high quality optics, DSLRs also allow you to significantly extend your shooting possibilities, and incorporate more advanced features. ➡ To help you get to know a few of them, we've created this guide. ➡ Here, you can learn about the popular Canon D60, D60x, T2i, EOS Kiss X1 and 80D. ➡ Even if you've never used a DSLR before, you'll be able to master the entire point-and-shoot setup in no time. ➡ In fact, you'll be able to shoot some really great images without even having to buy an SLR camera first. ➡ Your Canon camera will not only help you control the exposure, ISO, white balance, metering, color and contrast, and saturation, but will also enable you to shoot in manual mode. ➡ In other words, you won't need to be an expert to get started. Overview of popular DSLR cameras: Canon Digital Single-Lens Reflex (DSLR) Digital cameras are a type of digital camera which are equipped with a reflex mirror and a lens. This makes them capable of shooting pictures in both the optical and electronic form, which means that they can capture the image both with a mirror and with

an electronic image sensor. There are numerous professional camera brands that manufacture DSLR cameras, but the most popular are Canon, Nikon and Sony. Some consumers, however, prefer to buy brand-specific DSLR cameras because they are sold more cheaply (if the manufacturer is known to the buyer). Features of DSLR cameras Features of a DSLR camera, such as electronic viewfinder and battery life, are determined by the type of lens you use. DSLR cameras are mainly used to shoot media, either print or photographic. Because of this, they are equipped with a viewfinder to make sure that the subject is in the correct position. Additionally, the long lifespan of the
