However, there are many file editing, converting, and encoding problems that can occur when converting from MP3 to Dolby TrueHD. The most important of these problems are frequent loss of file integrity during the conversion, loss of audio quality, and loss of file quality. This document describes the minimum recommended conversion parameters that can be used to avoid these problems. This code is placed in the iAudioPlayer library to address the encoding issues and allow for compatibility with iAudioPlayer and other iAudioPlayer compatible DLL's.
