View a list of your transactions. You can filter by date and type. You can also view transactions for specific account. Facts: Full license 4.0/5 The world of banking is a tough one. Between the state of the economy, the lack of recognition for some electronic transactions, and the hassle of managing separate accounts, it can all get pretty complicated. Luckily, there are ways to simplify your life. One of the most popular options is mobile banking. Banker is one such application that provides a single place where you can view and manage all of your financial details. We've tested this app out and found it to be an extremely useful tool to streamline your finances. What You Get: Banker makes it easy to manage and track your income and expenses. Everything is easily accessible and can be viewed in an interactive calendar. Simplicity: One of the biggest things we liked about this app was its simplicity. There were no fancy features, and instead, you get a simple way to manage all of your account details. Device Compatibility: One of the features we like about Banker is its compatibility with a wide variety of devices. This includes the iPad, iPhone, and iPod touch. What We Don't Like: As a free app, there are a few things that you won't get that you would with a full version of the app. However, most of them are things that you can opt to get without any fee, including a full calendar view. Bottom Line: Overall, we found Banker to be an easy way to manage all of your finances in one place. The best part is that the app doesn't cost you anything, so you have nothing to lose. We highly recommend checking out Banker for yourself. Description: "Banker" is a simple way to view and manage your money.
