What's New in the?

SmartFTP is an extremely fast and reliable FTP program with an easy-to-use interface. Like most FTP programs it comes in two flavors: a server and a client. The server component is the actual "server" while the client component is the "client" that will connect to the server. The server is really the real power behind the FTP concept. The server provides the functions that make all of the other functions possible such as providing file transfer, directory listing, error checking, etc. If you need a full-featured, reliable and powerful FTP program, SmartFTP is the best choice. Features: Search all files and folders for name/text. Search only encrypted (password protected) files. Search only files with extensions. Search only zip files (zip password protected). Search only rar files (rar password protected). Search in subfolders only. Search only files bigger than a specified size (in MB). Search files modified within a specified time. Search files modified by a specified user. Search files modified by a specified group. Search only files with a specified content (hex or ASCII). Search files containing a specified string. Search files with a specified file type (zip, rar, exe, doc, etc). Search files with a specified creation time. Search files with a specified modification time. Search files with a specified access time. Search files with a specified creation time. Search files with a specified modification time. Search files with a specified access time. Search only files with a specified icon. Search only files with a specified icon. Search files with a specified date. Sort files by file type. Sort files by date. Sort files by date modified. Sort files by date created. Sort files by size. Sort files by size. Sort files by date added. Sort files by date created. Sort files by date modified. Sort files by date accessed. Sort files by size. Sort files by size. Sort files by date accessed. Sort files by date created. Sort files by date modified. Sort files by date created. Sort files by date accessed. Sort files by size. Sort files by size. Sort files by date added. Sort files by date created. Sort files by date modified. Sort files by date accessed. Print file list or directory contents. Export file list as text or

HTML. Print file list as HTML. Import file list from text or HTML. Split or Combine files and folders. Save
