The Japanese developer
was clever enough to
develop a program that
offers all the basic
functions of a webmail
interface without the
irritating ads. The
interface is not lacking

and there is no shortage of options to save your time. What is noteworthy about this Chinese application is that you can use it as a webmail interface and as an e-mail client, as Foxmail is capable of supporting many types of accounts, such as accounts provided by Yahoo! Mail, Gmail or Hotmail. Software

Publisher's description:

Foxmail helps you manage multiple e-mail accounts simultaneously with ease. You can browse through all the emails you received by specifying a particular folder and compose a reply while keeping track of your traffic and response stats. Foxmail provides you with many handy tools to improve

the email management process and organize it to your heart's content.

The software is surprisingly fast and can be used by anyone from the computer novice to an experienced e-mail user. YcMessenger
