## WinTermPlus

WinTermPlus is an application that allows you to switch between Windows Terminal and other programs easily, without having to open the terminal and use a keyboard combination. It's a tool that'll do the job for you! Starts the installer in a limited user mode, which lets you use all of the app's features, but prevents you from deleting system files or installing other software. You can install the app to your computer's Program Files folder, or you can install the app to your computer's Program Data folder. For additional help, see the software developer's website. Notes: WinTermPlus is licensed per user, not per computer. It is not necessary to have Microsoft Windows 7 to use WinTermPlus. For more information, see the WinTermPlus license agreement. End User License Agreement (EULA): If you purchase WinTermPlus from the link above, then you have the right to use the product for 30 days, free of charge, after the purchase. If you purchase WinTermPlus from the WinTermPlus website, the 30 day trial period begins the date that you install the program. If you download the software, the full version of WinTermPlus is always 30 days from the date of purchase, whether or not you use all 30 days. The product is for personal use only. You may not share the product with any other person or company. The product is protected by copyright, trademark, and other intellectual property rights owned by Charles River Software or its licensors. You may not remove or alter the copyright, trademark, or other intellectual property rights notices on the product. You may not distribute the product to a third party or use the product in a way that is contrary to the license agreement. You may not reverse engineer, decompile, or disassemble the product. You may not sell the product, transfer the product to a third party, or include the product in a shareware package. The product is not intended for use in the performance of military or governmental activities. You may not use WinTermPlus in a way that violates any applicable law or regulation. Version History: 3.2.01 (13/11/2018) - Fixed a bug where keyboard layouts could cause non-recoverable error messages to appear. 3.2.00 (10/06/2018) - 1d6a3396d6

## WinTermPlus

This application is a Windows Keyboard Macro Program for Windows 9x/Me/2000/XP/Vista. Provides you with the ability to perform tasks with the keyboard by defining hotkeys. You can create macros that can be performed with a single hotkey or a combination of hotkeys. Macro feature includes the capability to type any character on screen, reposition windows, minimize or maximize Windows, etc. You can modify or delete a hotkey/macro with a keystroke. This program can be run as a stand-alone utility. The application can be started by clicking the icon on the taskbar, by double-clicking the "Run" icon on the icon in the system tray, or by selecting Start -> Run. Keyboard Macro Control Utility is a Windows application which will allow you to manage your keyboard hotkeys. Manage the hotkeys used to open, minimize, maximize, and move windows. To reduce the number of keys you use, you can assign keys for every function you use. You can also assign a single hotkey to run multiple macros. Keystrokes assigned to macro hotkeys are carried over to the keyboard itself. Create keyboard macro programs, navigate your window with keystrokes. Create and edit keyboard macro programs using the easy to use user interface. You can use keyboard macro programs to perform several operations. You can create a keyboard macro that will be run when you press a single key, or a keyboard macro that is run when a key combination is pressed. Keyboard Macro's KeyScribe includes hotkeys to: - Minimize all windows - Minimize all windows except those in specific program groups - Maximize all windows except those in specific program groups - Maximize all windows except those in specific program groups and reduce all other windows - Restore all windows except those in specific program groups - Restart your computer - Launch any application - Maximize all windows - Minimize all windows - Increase the amount of memory the computer has available - Decrease the amount of memory the computer has available - Stop playing all audio - Play all audio - Increase/decrease the volume - Restart your computer - Launch any application - Maximize all windows - Minimize all windows - Maximize/Minimize all windows - Restore all windows except those in specific program groups - Restore all windows except those in specific program groups

## What's New In WinTermPlus?

Windows Terminal is a console application that allows users to do all the usual tasks on their system. This application makes a great companion to the Windows GUI because it helps to ease the work process. Features: \* Interface/Settings \* The main function of the program is to move the Windows Terminal window to the front or to the background with a single hotkey \* There is also an option that lets users pick between left, center, or right (hotkey combination) to move windows to the specified position \* The program lets users pick a standard size for the Windows Terminal window \* Users can decide to move the terminal window whenever the application is opened (this means Windows Terminal will always be on top of the other windows) or only when the application is opened \* In addition to moving the application to the front/background, users can also activate/deactivate the Hotkey combo \* The program can also show/hide the window notification area of Windows \* The program also allows users to choose between having the Windows application icon on their task bar and having a dedicated icon of their own \* Users can also select the color and transparency of the window \* The program lets users move the Windows Terminal window to the top, bottom, or center of the screen \* Users can also remove the vertical scroll bar of the Windows Terminal window (this is useful if they have a particular display setting set in their system) \* Users can also lock the terminal window when they have it in the background \* Users can also lock the terminal window when they have it in the front \* Users can also copy the text that appears in the Windows Terminal window to their clipboard \* Users can also paste the text that was previously copied to their clipboard in the Windows Terminal window \* Users can also have the program automatically start when the computer boots \* The program lets users also set different hotkey combinations for starting and shutting down \* Users can also hide the Windows Terminal icon in their task bar \* Users can also set the system tray icon to be colored or not WinTermPlus is a useful application. As you can see from the screenshots, this program is quite easy to use and to understand, which makes it a great add-on to Windows Terminal. There's also an option that lets you pick between left, center, or right (hotkey combination) to move windows to the specified position. Of course, a nice feature would have been to actually have the possibility of changing the hotkey combination yourself. Otherwise, the program does exactly what it's supposed to. For those who don't know how to use this program, the interface has some nice features. You can even set the Windows Terminal size by using the two lower-positioned sliders in the menu. It's all well arranged and helpful, there is no debate about that. Of course, a nice
